DETAILED ACTION***Allowable Subject Matter***

1. Claims 6, 7, 9, and 10 allowed.
2. The following is an examiner's statement of reasons for allowance:

U. S. Patent No. 4,723,216 to Premerlani in view of U. S. Patent No. 5,165,051 to Kumar are references closest to the claimed invention. Premerlani in combination with Kumar discloses a method for determining an amplitude and phase angle of a measuring signal corresponding to a current or a voltage on an electrical power supply network by using sampled values of the measuring signal, the method comprising the steps of: using a model of the measuring signal containing a sinusoidal component in accordance with the relationship $y = A \cdot \sin(2\pi ft + \phi)$, with y designating an instantaneous value of the model of the measuring signal, A designating a model amplitude parameter of the measuring signal, f designating a model frequency parameter of the measuring signal, ϕ designating a model phase angle parameter of the measuring signal and t designating time; and using both the model of the measuring signal and the sampled values, a recursive nonlinear least-squares estimation method, to determine the model frequency parameter of the measuring signal by the estimation together with the model amplitude parameter and the model phase angle parameter. However, Premerlani in combination with Kumar do not teach a model of the measuring signal containing a sinusoidal component in accordance with the relationship $y = A \cdot \sin(2\pi \sum_{i=0}^n f^{(i)} t^i) t + \phi$ with $f^{(i)}$ designating an ith order time derivative of the frequency and modeling a change in the frequency over time, and various

orders of the time derivative of the frequency being taken into account by selecting an variable n; and including all of the other limitations in the respective independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
